Phase 2 Mark Document, Group #9

Info:

Graded by:

[Section 2] Stephen Luc (stephen.luc@mail.utoronto.ca),

[Section 3] Daniel Persaud (dev.persaud@mail.utoronto.ca)

Remark Policy & Rubric: please consult the handout / course syllabus, see mark breakdown section for weighting of deliverables.

Mark Breakdown:

Section 2

2.1	Product Backlog - Epics (if applicable)	1	/1
2.1	Product Backlog - User Stories	2	/2
2.2	Sprint Backlog - Tasks	0.5	/1
2.2	Sprint Backlog - Sub Tasks (if applicable)	1	/1
	Section Total:	4.5	/5

Section 3

3.1	Single Responsibility Classes	1	/1
3.1	Collaborators	2	/2
3.1	Use of Inheritance	1.5	/2
	Section Total:	4.5	/5
	Total Mark:	**9**	**/10**

TA Comments:

- Remember that 1 story point equates to 1 work day, so try to avoid adding in User stories where the sum of the story points are greater than work days in the sprint. (-0.5)

- is UserCreation necessary? why not just do something like user = new UserAccount([args]); user.save(); Just a thought, its totally a design decision.

- Suggest renaming FileIndexing -> FileIndexer

- UserPasswordDatabase, why is this not merged with UserDatabase? (-0.5)
